Subject: Las Conchas Sample Results
Date: 07/05/2011 10:23 AM
Importance: High

We have prelim results for 18 samples. The labs reported gross alpha, gross beta, and the gamma spec results (Cesium-137) the same day that samples were received and the data is loaded to scribe. I believe the samples showed no results above background, but am awaiting confirmation from the Certified Health Physicist in the field.
